

## BACKGROUND

The X2.0 promotes the growth and strengthening of relationships between moderately innovative and highly innovative regions by providing needs based, custom, industry-focused, growth programs to deep-tech startups. The project will distribute €1.5M in innovation and scaling up services to 50 deep tech startups and will contribute to the offering of the EIC program.

## BRAND CONCEPTS

Technology is the main concept of this corporate image, represented as a fluid element instead of a rigid one, making reference to the union between different ideas to generate improvements in progress.

The union would be the second point represented, it is represented through joined circles, or circles that give rise to other circles, in the same way that ideas, when joined together generate new ideas.
