

Matterpieces

Transform architecture into a more circular industry,
by making it beautiful while reducing impact.

Construction:

- 1/3 of
global waste

- 50% of
natural material
extracted from
earth

Portugal:

P 3

90%
of natural material
extracted
=
60MTon

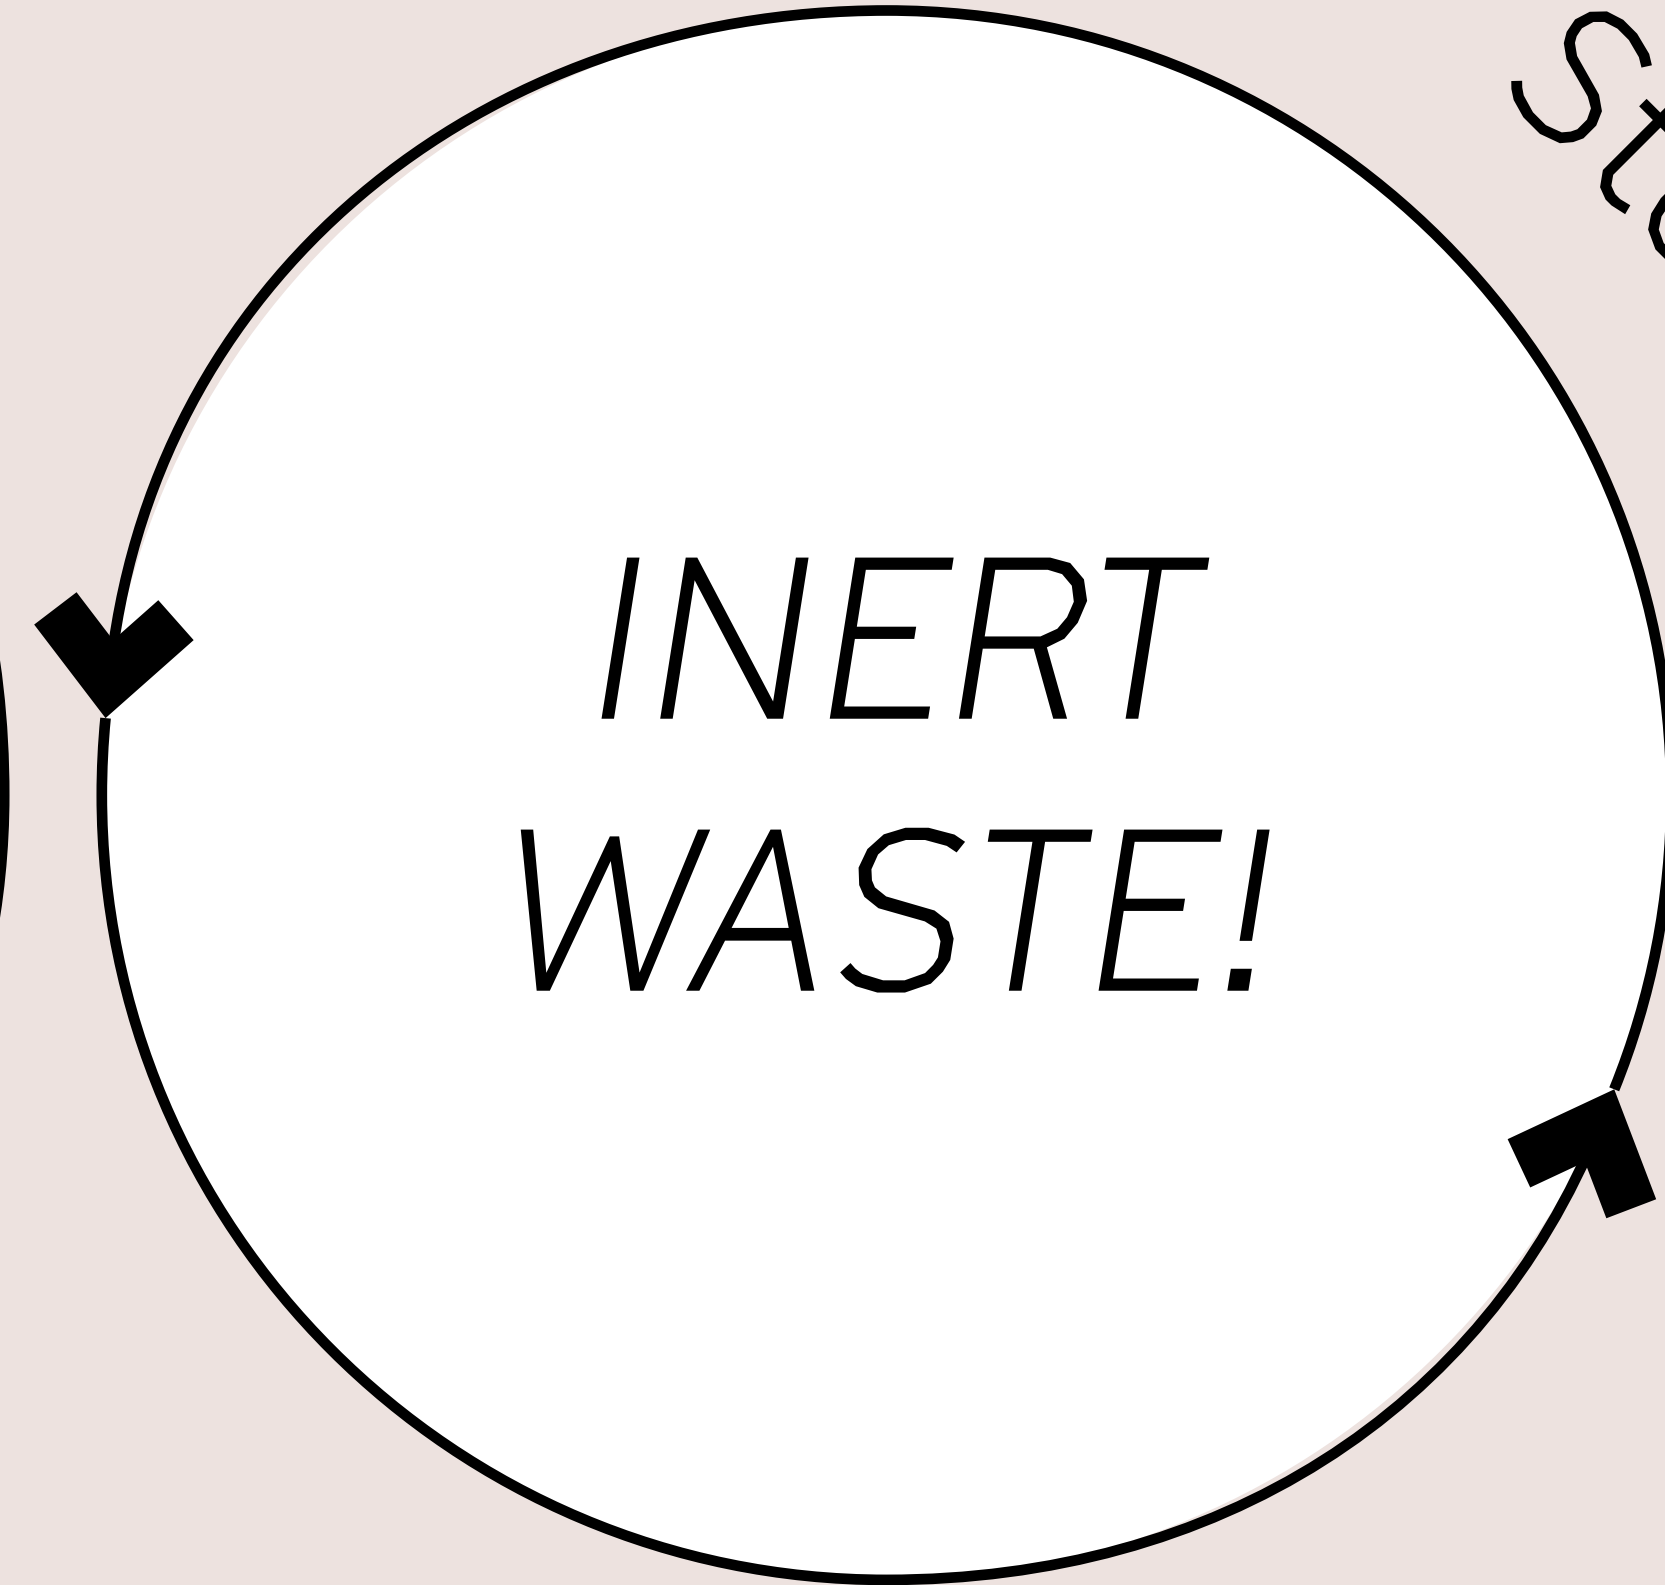

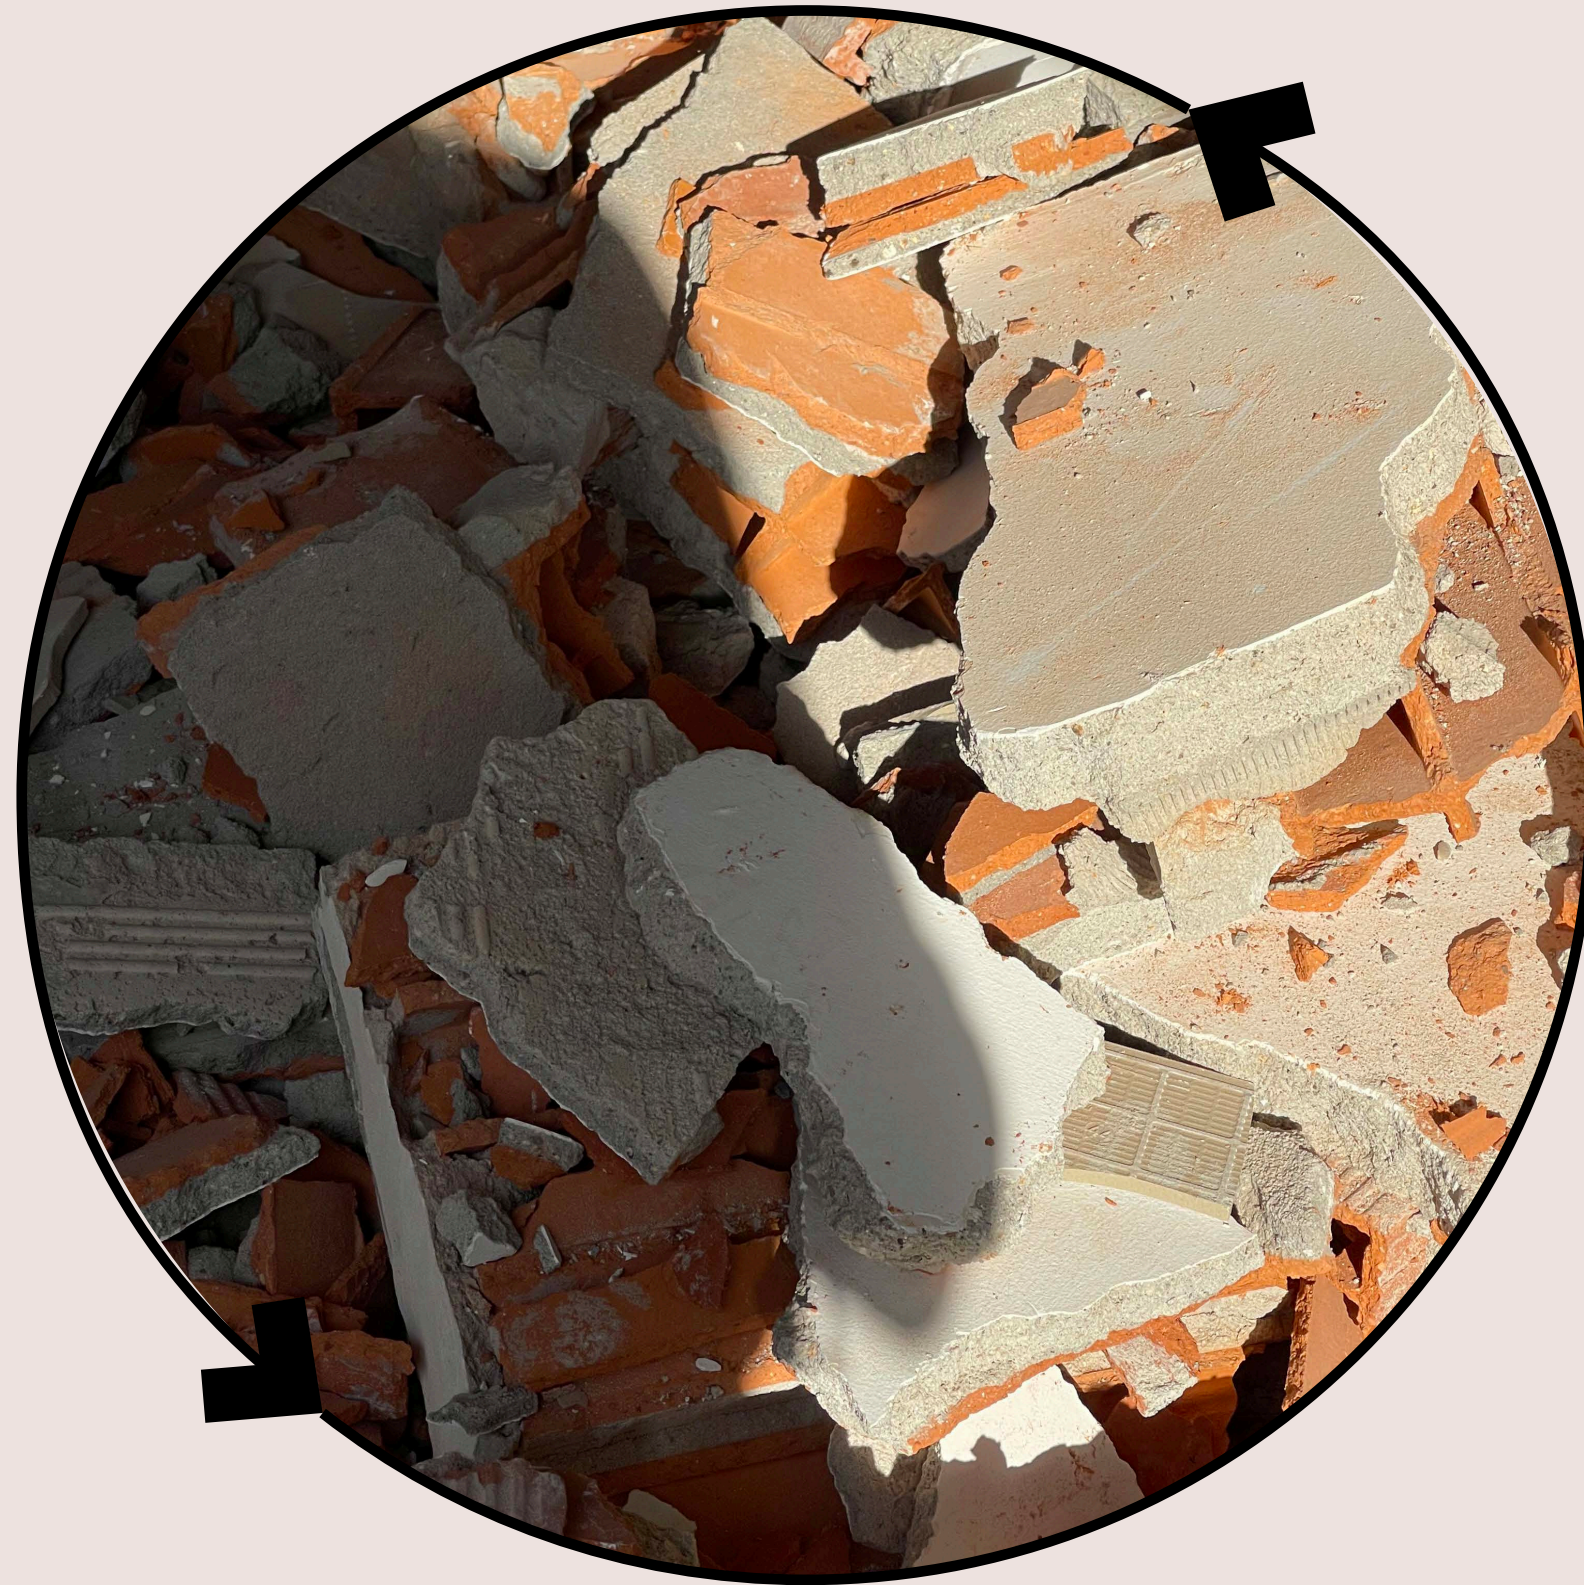

20MTon
=
construction
waste produced
per year

Our solution, upcycling!

90% of demolition waste is inert

WASTE!*

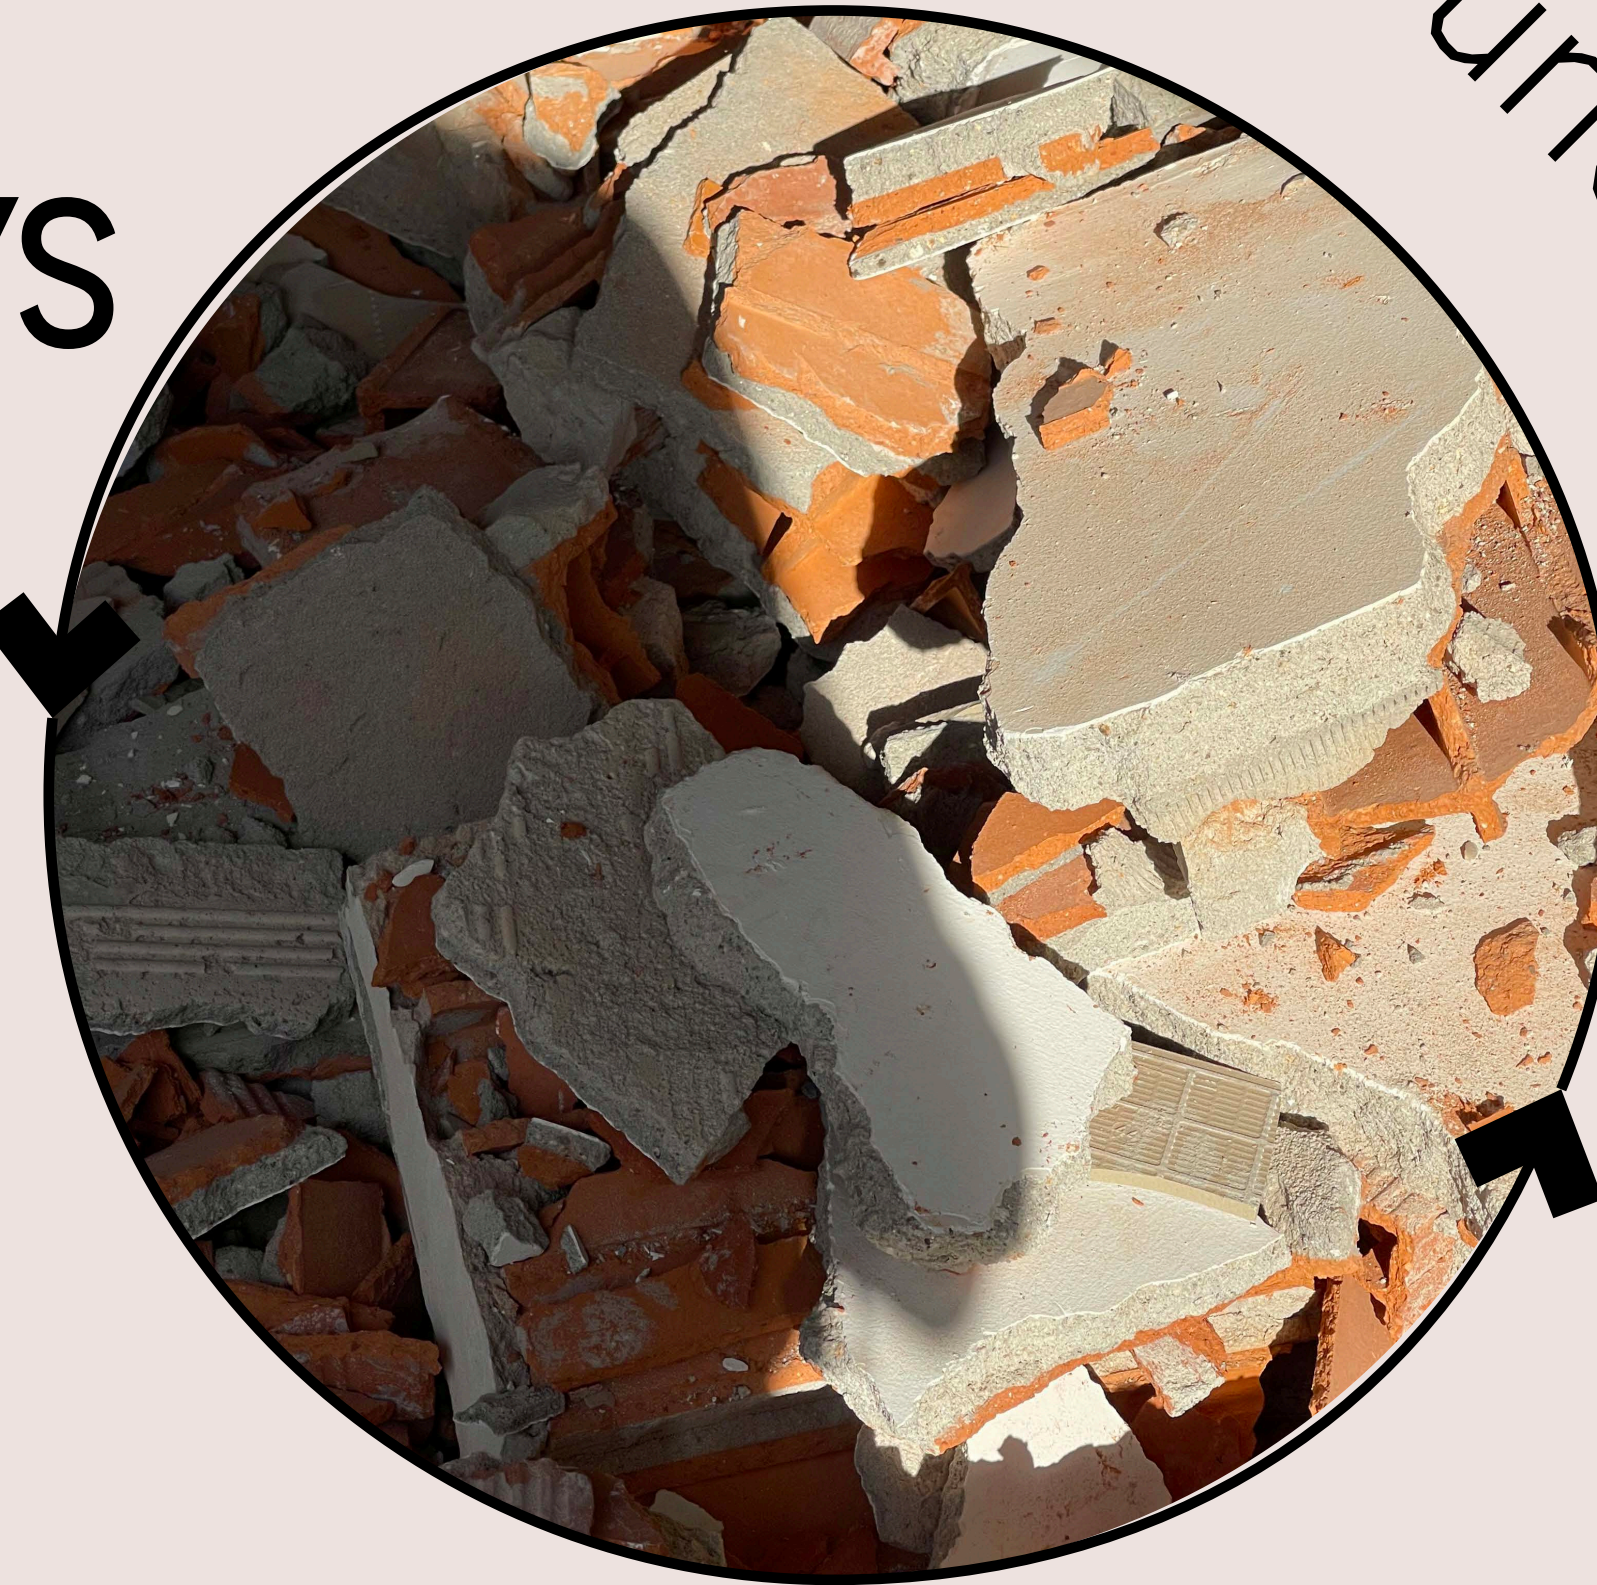

Our solution, upcycling!

cheap

raw-material

abundant

VS

raw materials
are getting expensive!
policy for waste is
getting tight!

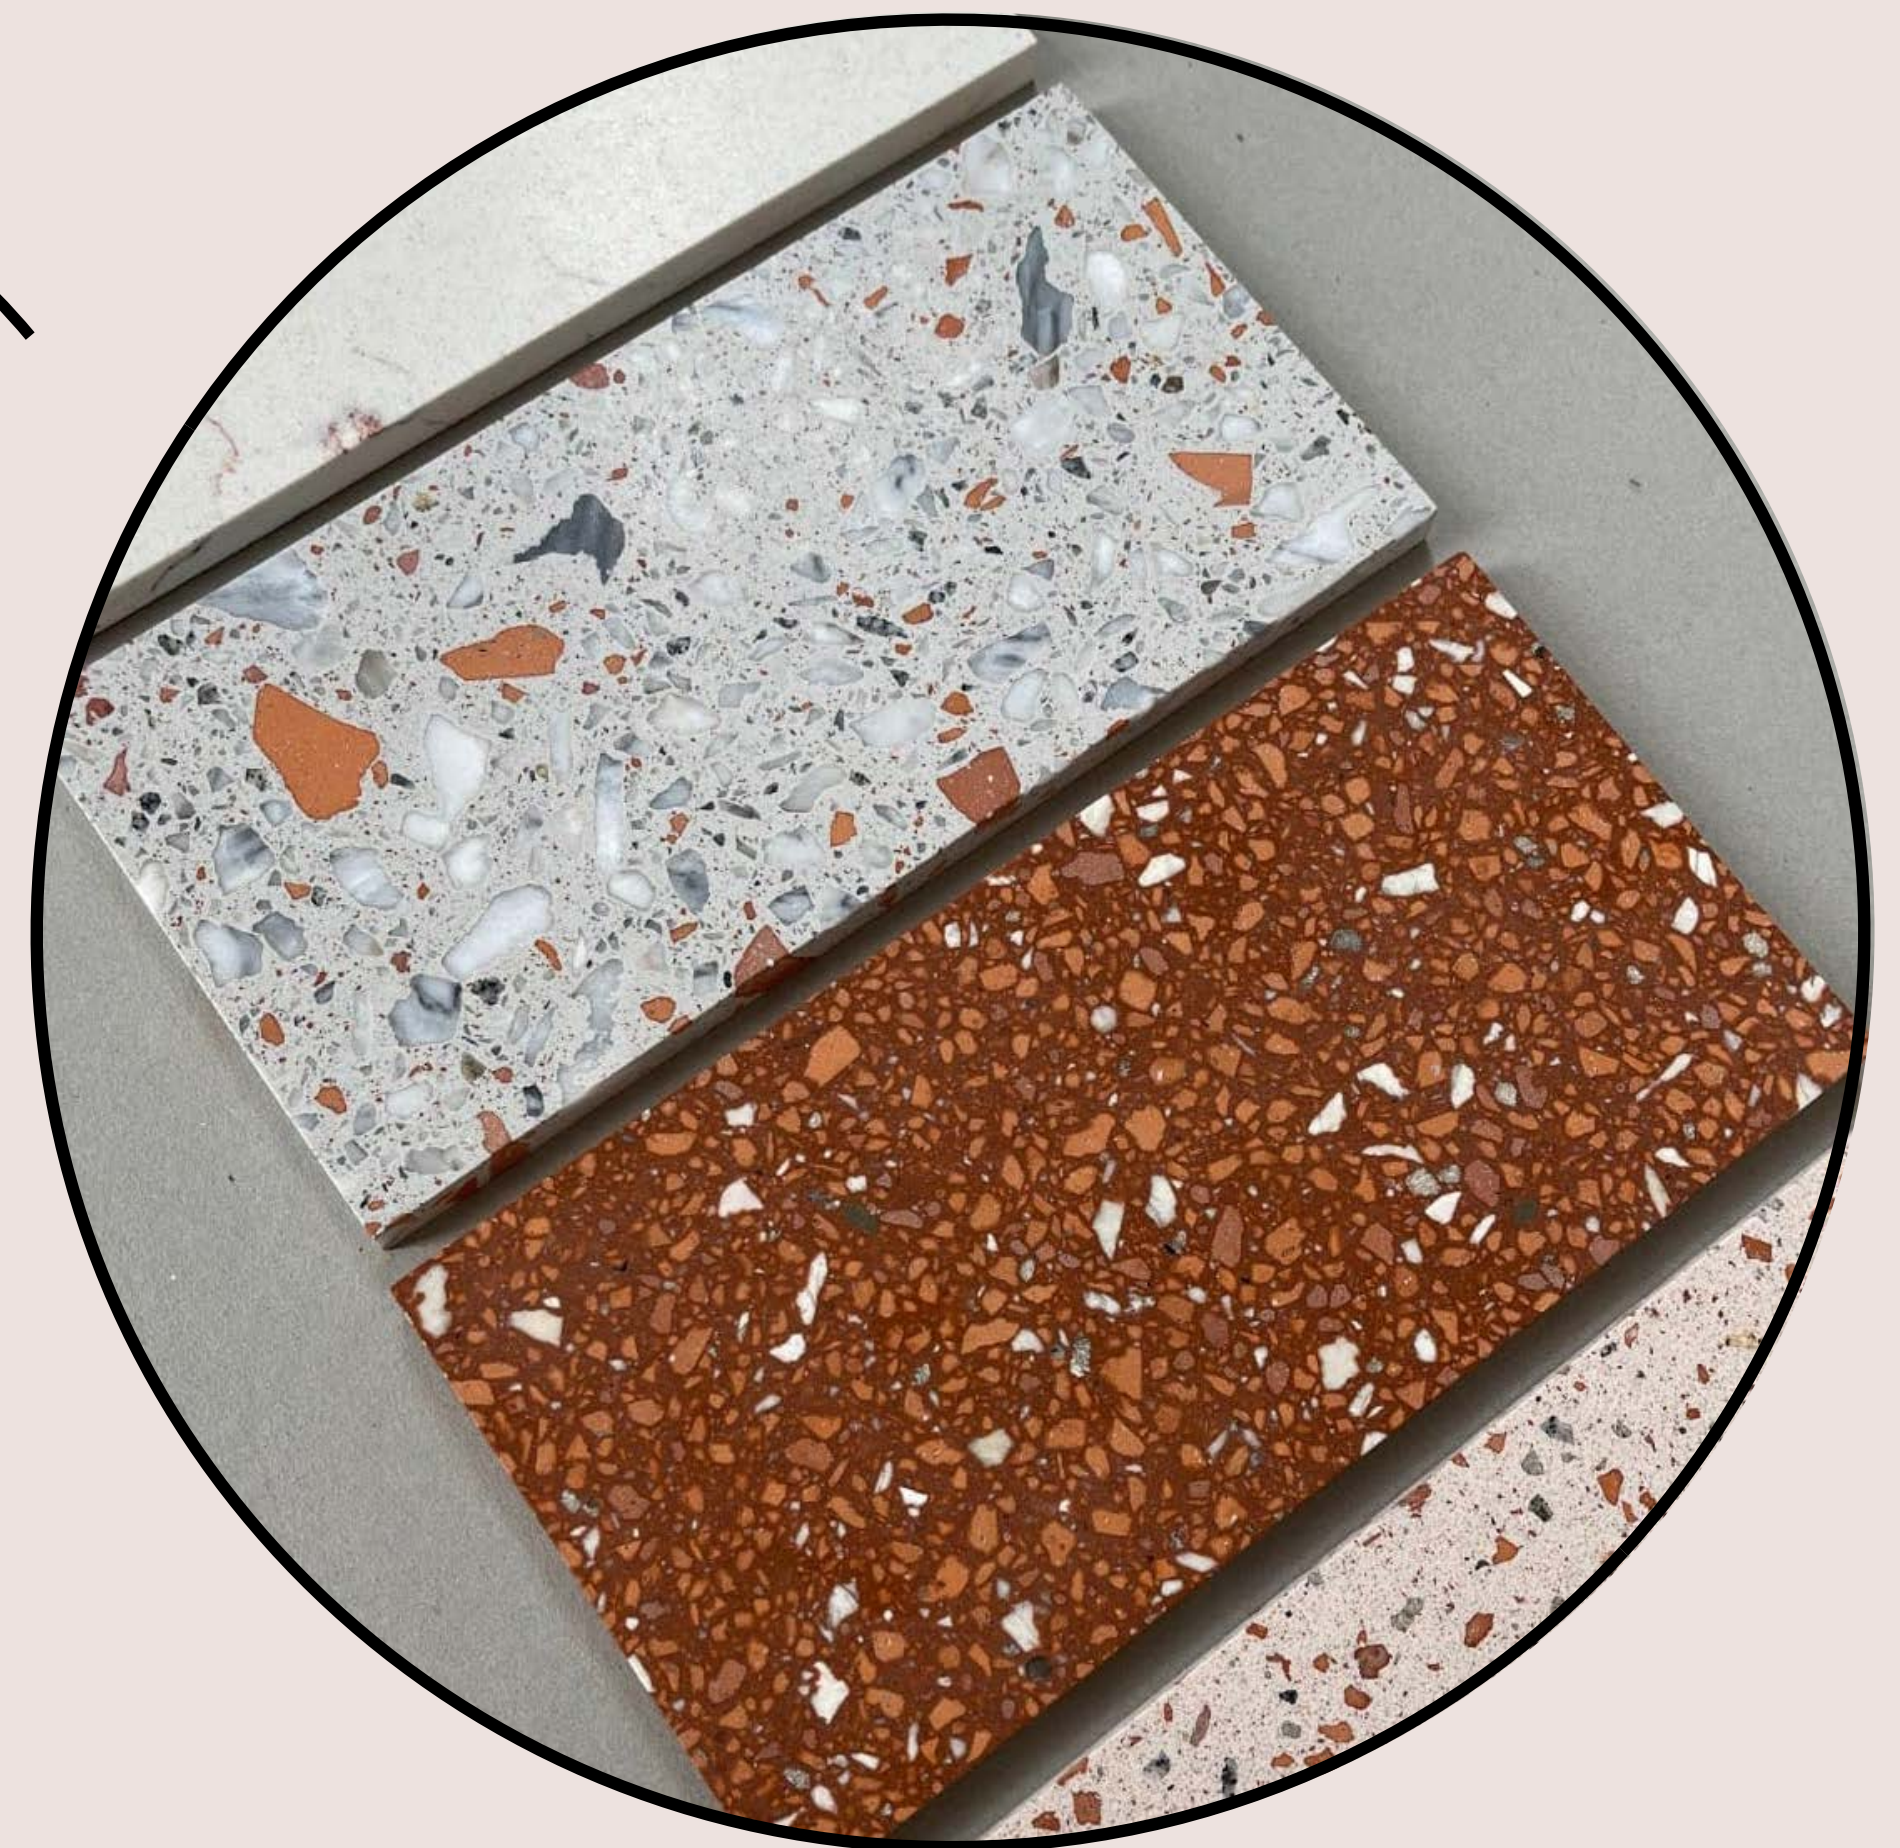

Matterpieces

The image shows the interior of a building undergoing renovation or demolition. The walls are made of rough, textured concrete or masonry, with some areas appearing to be covered in white tiles that have been partially removed. The floor is covered in a thick layer of rubble, including broken bricks, concrete fragments, and debris. In the center, a doorway leads to another room, which appears to be a kitchen or a similar functional space, with a red object (possibly a chair or a piece of equipment) visible in the background. The lighting is dramatic, with a bright light source from the doorway creating a strong contrast and casting long shadows. The overall atmosphere is one of decay and the process of rebuilding.

What we want to change:

We want to give demolition waste a second life while reducing its deposition in landfills and improving separation practices in Portugal.

How we want to change:

Two scales:

WIDE
LANDFILLS

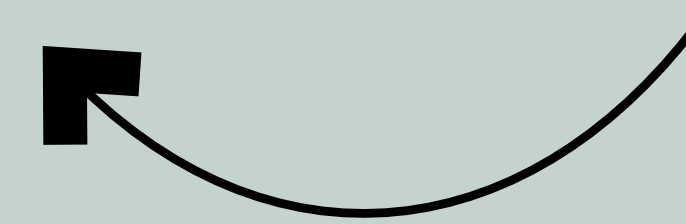

SPECIFIC
REFURBISHMENTS

We are value!

- It's customized!
- It's flexible!
- It's affordable!
- It's a story!

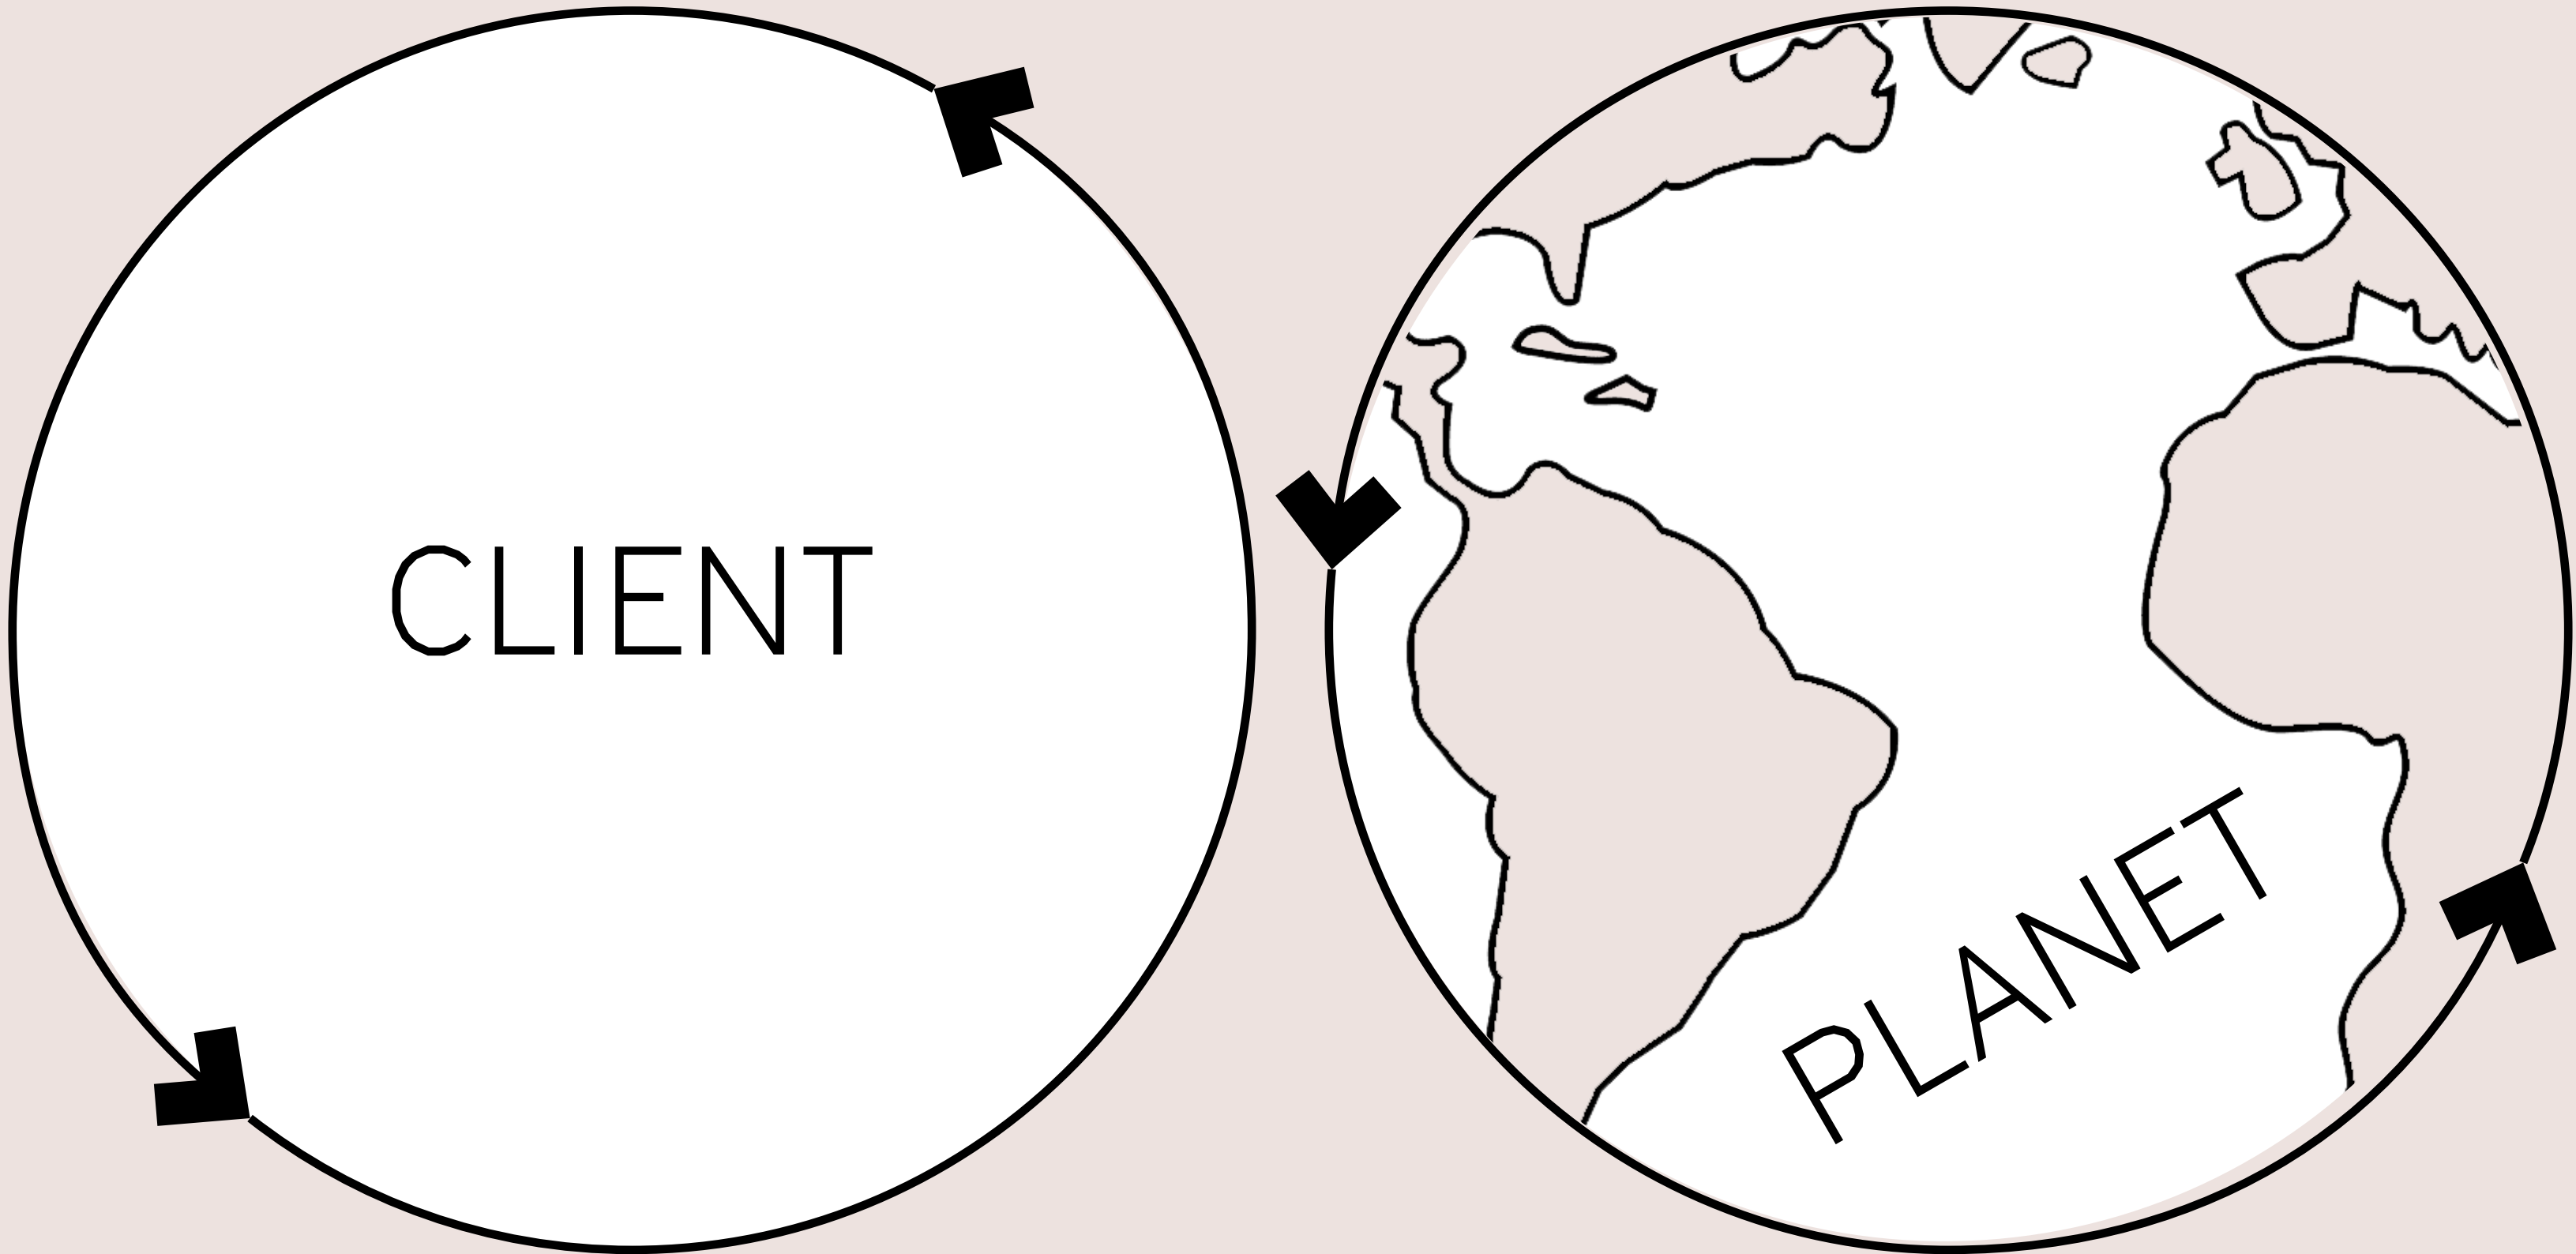

We are value and impact!

Less extractive!

At least 50% waste!

It's a movement!

Change the industry!

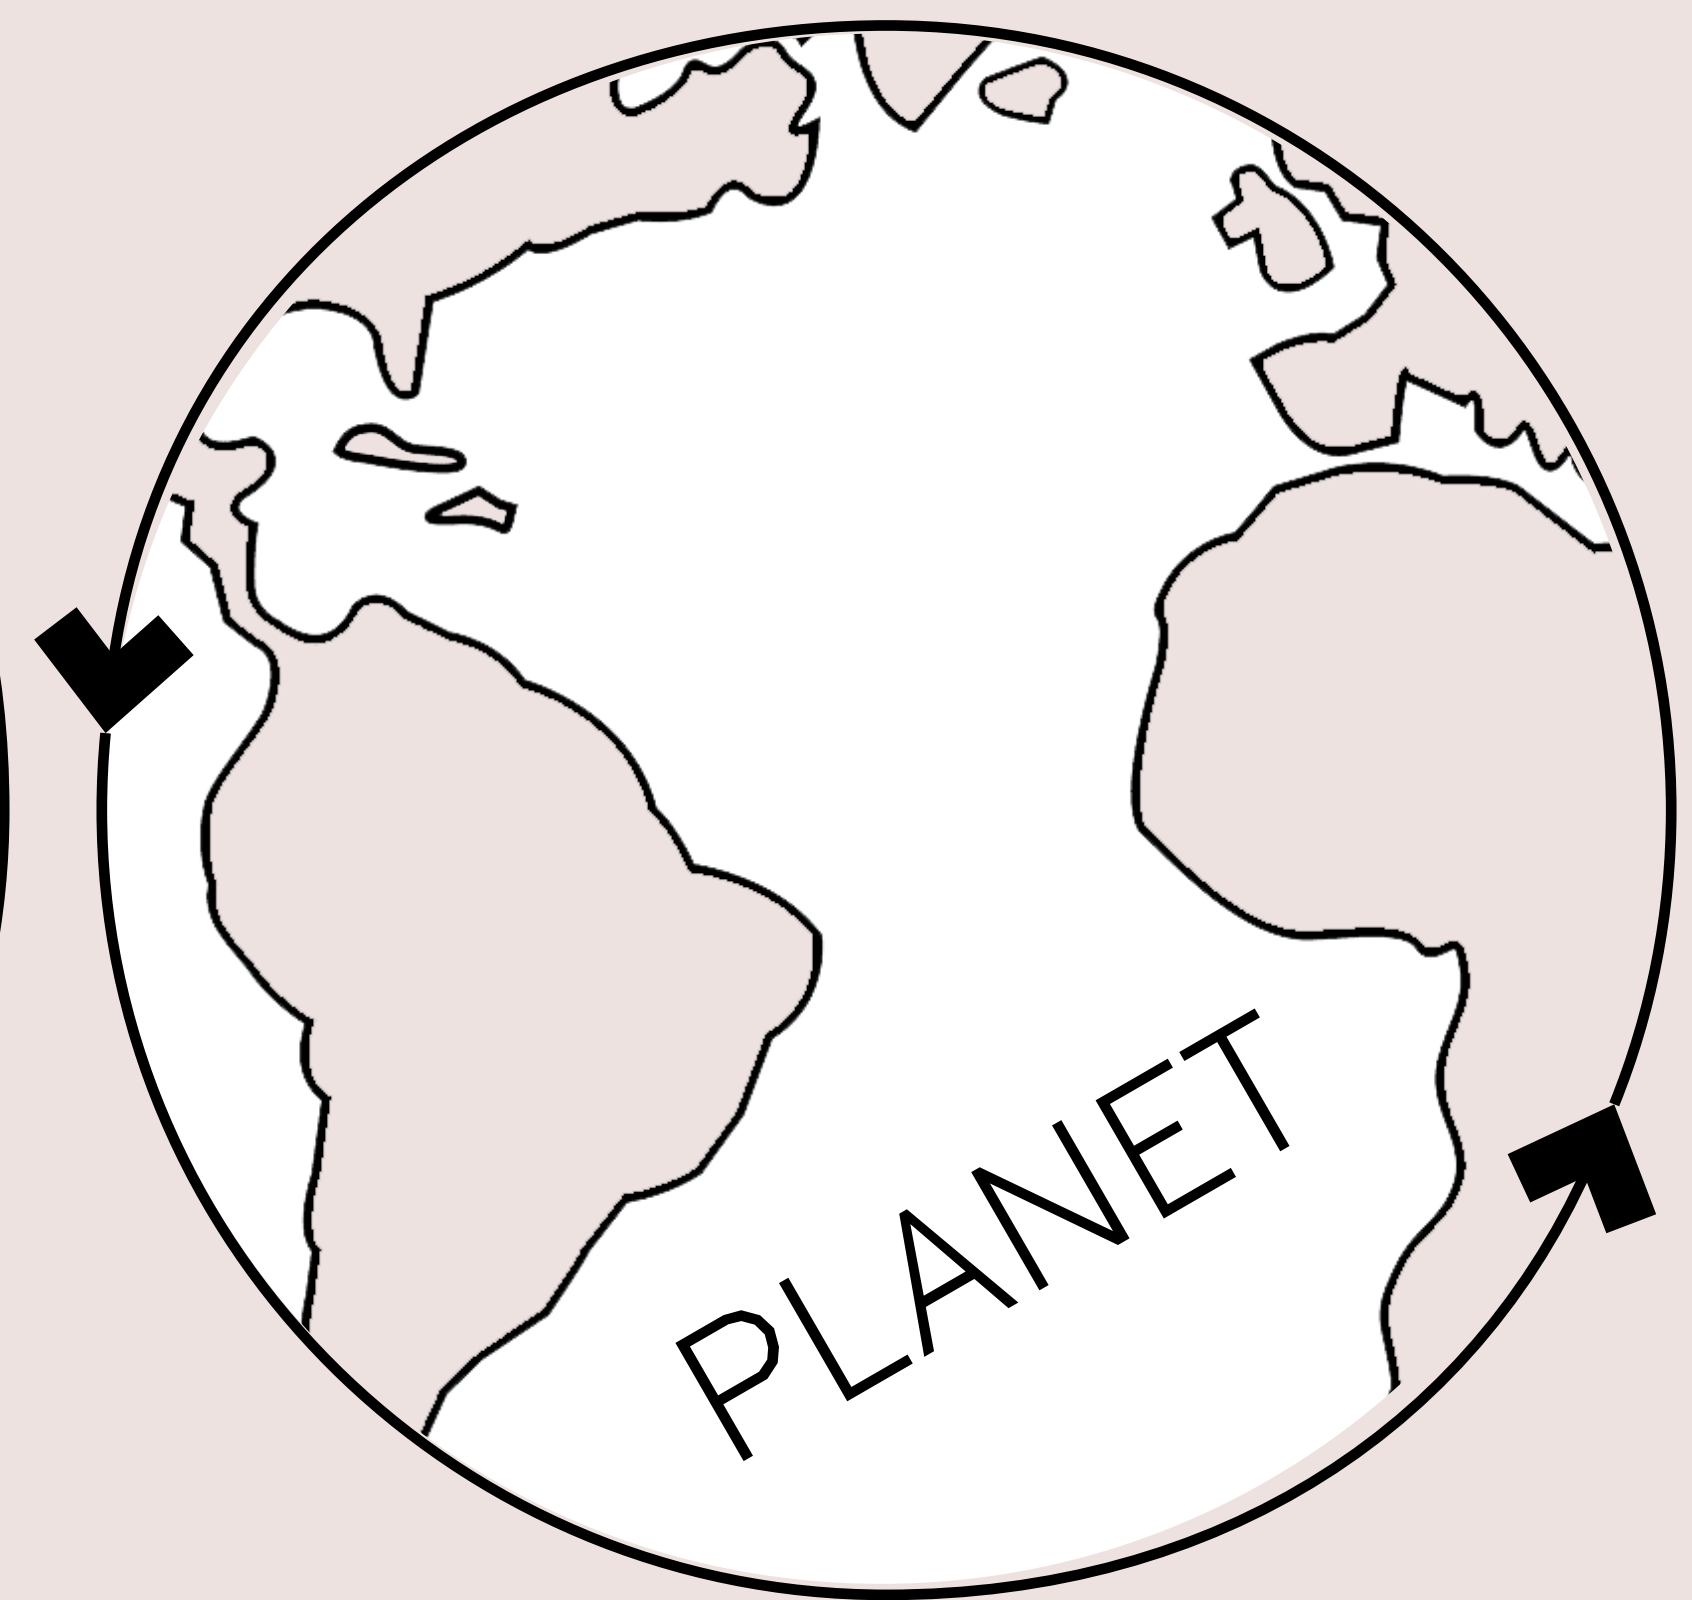

We are impact and community!

Community!

Teach!

Repair!

Raise awareness!

We have a dream team!
